Dr. Scott F. Gillman

PATIENT INFORMED CONSENT TO TREATMENT

The nature of chiropractic treatment: The doctor will use hands or mechanical devices in order to move your joints and mobilize soft tissues (e.g. muscles, ligaments). A “crack” or “pop” sound is an inherent, natural effect of joint movement. Various other procedures, including, but not limited to hot packs, therapeutic ultrasound, laser, extracorporeal shock wave therapy, exercises and massage or other soft tissue therapies may also be used. ***Physical examination requires physical contact:*** it involves the doctor manually challenging your joints and testing your muscle strengths which can sometimes lead to temporary soreness or worsening of your pain. Treatment is very hands-on and involves a lot of clinical body contact by your doctor, especially for procedures such as deep tissue massage and stretching. ***Please inform your doctor if you have any concerns about your safety or comfort before, during or after your treatment.***

Possible risks and side effects: As soon as *any* doctor intervenes with your healthcare there is a risk of side effects and complications. Research has shown that the risk of serious complications from chiropractic treatment is ***extremely rare***. While less serious complications are possible, most are highly unlikely, but could include fractures, sprains/strains, injury to intervertebral discs, nerves, spinal cord, a worsening of symptoms or development of new symptoms. Cerebrovascular accident such as a stroke is highly sensationalized by the media, but real research proves that it is very rare, with odds calculated as one in a million to one in forty million, about the same odds of a stroke from having your hair washed in a salon (“beauty parlor syndrome”), and significantly less than the odds of being struck by lightning. Usually, side effects of treatment include transient muscular stiffness or soreness; some people report feeling like they exercised new muscles for the first time. Some procedures (e.g. hot packs or deep tissue massage) could produce skin irritation, burns or bruises. Keep in mind that other treatment options such as over-the-counter analgesics, prescription medicines, surgical procedures, and hospitalization all carry ***significant*** risks and side effects, greater than those encountered in a chiropractic office.

Risks of remaining untreated: While it is possible that your symptoms may go away without any treatment whatsoever, delay of treatment could complicate recovery, lead to worsened or chronic pain, or deteriorate your health.

I have read the above explanation regarding chiropractic treatment. I have had the opportunity to have questions answered to my satisfaction. I freely decide to undergo the recommended treatment, and hereby give full consent to treatment. A photocopy of this document is considered as effective and valid as the original for any successive services.

WORKERS COMPENSATION POLICY

If you have been involved in an on-the-job injury you are entitled to receive medical/chiropractic treatment. The injured party, in most instances, is allowed freedom of choice in selection of a doctor.

To activate your claim, you must do the following:

1. Report your injury and complete an accident report and have it on record with your employer. You must be specific when reporting your injuries. Omitting one symptom or injury may result in your services being reduced or denied in full.
2. Furnish this office with all the pertinent information that relates to the accident. Specifically:
 - a. Provide this office with the name, address, contact person and phone number of your employer.
 - b. Provide this office with the name, address, contact person, phone number and claim number of your employer's worker's compensation insurance carrier.
3. If you seek legal counsel, please provide this office with the name, address, contact person and phone number.

Failure to complete the above steps can result in your being personally responsible for the payment of services rendered by this office.

The worker's compensation carrier will be notified of your treatment plan with our office and will be billed directly. If the claim is approved by the Worker's Compensation carrier, payment for services rendered will be paid directly to this office. If the carrier denies your claim or refuses to pay your bill, it will become your responsibility to make payment for any services or fees. Charges for missed appointments will not be billed to the insurance carrier and are your responsibility with this office.

I have read and understand the above policy. A photocopy of this document is considered as effective and valid as the original for any successive services.

SECURE EMAIL NOTIFICATION / WAIVER

In order to comply with the Federal HIPAA Security Rule, our office has implemented the use of a secure, encrypted email program (Sendinc.com) to send and receive email which contains **protected health information** (PHI).

Secure email can easily be sent to us by going to this web site or through our patient portal (Patient Ally). To send and receive email requires you to register and create a password. **Note:** You must be sure to **check your Junk Mail or Spam** folder as some patients report that the secure email goes directly to those folders instead of the inbox. We recommend you open and save documents immediately as **Secure Email** will automatically be deleted (made inaccessible) after 7 days if not opened.

Some of our patients have requested to use standard (non-secure) email even though there is a risk that their PHI will no longer be private or protected and may become public information or used for insurance fraud or identity theft if the email system is hacked at either end.

It is your right to request to have your correspondence sent via standard email. However, if you choose this option, you must acknowledge that you were informed of, understand, and accept the risks of using non-secure email for patient communication containing PHI.

PLEASE CHECK ONE BOX ONLY

I choose to use Secure Email (Sendinc.com) for email correspondence containing PHI.

WAIVER: The provider has explained to me and I fully understand the risks associated with using standard email for correspondence which contains protected health information (PHI). I hereby acknowledge and accept those risks and request that my email correspondence be sent via standard (non-secure) email.
